## 21. What problems do you notice in the project? Could you suggest how to solve it?

Odpowiedzi: 5 (25%)

Respondent 1514541	I would have liked to go further in sciences issues.. but maybe it will be the in the pipeline for this year.
Respondent 1472802	Sometimes it's not easy to manage the time to prepare all the activities carefully, before a mobility or when our school hosts the other partners as we have our own classes and school responsibilities happening at the same time.
Respondent 1434319	We didn't notice any problem in this project.
Respondent 1424985	The coordination and interaction between the participants has been excellent. Whenever a target is missed or some obstacle has emerged, the team has been able to solve all problems. The only problem that I point out, is related to the management of the number of participants in each meeting. This number of students was left to the discretion of each host country and generated some imbalance. In my opinion it should have been decided at the beginning, with a minimum and maximum number of participants.
Respondent 1413615	In some meetings, teachers communication can be very complicated. I think it is directly related with the management or being facilitator of the meeting. Finally, coordinators can have misunderstood for the program and this results with the complicated situations on the following meetings.
